SUBJECT: Proposed Foreign Travel for [REDACTED]
[REDACTED]

b. Site Inspection Tours

[REDACTED] would particularly benefit by having the opportunity to visit the [REDACTED] SAM Firing Range, which tests in an operational mode a variety of surface-to-air missiles. In addition, an inspection of the [REDACTED] would provide a basis for comparing imagery evaluations of related foreign ABM facilities.

An opportunity for [REDACTED] to visit the solid propellant plant at [REDACTED] to discuss details of production would be helpful to him in future analysis of foreign production plants. In addition, an inspection of the [REDACTED]

[REDACTED] would provide further information about missile production techniques.

The primary concern of the [REDACTED] [REDACTED] is the imagery analysis of tactical weapons systems. It would be of advantage for [REDACTED] and [REDACTED] to have the opportunity to visit this facility in order to discuss and exchange information on tactical weapons including SAM deployment and production in Eastern Europe and particularly in the Mid-East.

In order to visit the [REDACTED] it would be necessary for [REDACTED] to receive a USEUCOM clearance briefing at [REDACTED] [REDACTED] on the morning of 19 October 1970.

Because of the missile-related function of each facility and NPIC's interest in them, it is proposed that [REDACTED] travel together to each facility [REDACTED]

AEM *M*

- The obvious problem with this itinerary is that anyone who looks at it closely (and they do, they do) receives the impression that the purposes of the trip are both business and sightseeing;

sightseeing

time totaling 9 out of the 23 days. That will not wash.

- I suggest that they leave Wash. on 3 Oct. and return to Wash. on ~~24 Oct~~ 23 Oct.
